Test Report No. 10317-1/2024

Forest and Wood Products Research and Development Institute Testing Laboratory

Customer: SIA Yappy Kids Registration number: 40103862792 Customer address: Zemitana iela 9, Riga, LV-1012, Latvia

Manufacturer: SIA Yappy Kids Registration number: 40103862792 Customer address: Zemitana iela 9, Riga, LV-1012, Latvia

Owner of the test report: SIA Yappy Kids Registration number: 40103862792 Customer address: Zemitana iela 9, Riga, LV-1012, Latvia

Date of the order: 06.12.2024.

Test performed at: Forest and Wood Products Research and Development Institute SIA, Krišjāņa Barona street 40A, LV-3001, Jelgava, Latvia.

1. Order content:

Testing in accordance with Standard:

- EN 716-2:2017 "Furniture - Children's cots and folding cots for domestic use - Part 2: Test methods".

Following the requirements of Standards:

- EN 716-1:2017+AC:2019 "Furniture - Children's cots and folding cots for domestic use - Part 1: Safety requirements".

2. Information provided by customer about delivered test specimen:

- Test sample:	Wooden cot.	
- Name of the sample:	YappyÉtude cot.	
- Type of the material:	Beech wood.	
- Sample dimensions:	L=125cm, W=67cm, H=89cm.	
- Sample production date:	December, 2024.	
- Sample production place:	Riga, Latvia.	
- Sample manufacturer:	SIA Yappy Kids.	
- Date of sampling:	06.12.2024.	
- Sampling place:	Riga, Latvia.	
- Sampling done by:	SIA Yappy Kids.	
- Procedure of sampling:	The sample taken from the production line.	
- Other information:	-	
3. Laboratory description of the specimen and test method:		
- Test sample:	Childrens cot.	

- Test sample.	Cilitatens cot.
- Laboratory number for sample:	10317-1.
- Number of the samples:	1 (one).
- Test standard:	EN 716-2:2017.
- Test sample delivered:	18.12.2024.
- Test sample delivered by:	Courier.
- Test sample test date:	06.01.2025 09.01.2025. 22.01.2025.

Figure 1: Wooden cot "YappyÉtude cot".

Figure 2: Side view.

4. Description of the delivery condition of the unit:

- Test specimen delivered in cardboard packaging in normal condition.

- The test specimen after assembly has been kept in indoor ambient conditions for at least 1 week immediately prior to testing.

- Knock-down fittings are tightened before testing.

- The tests are carried out in indoor ambient conditions at a temperature between 15 °C and 25 °C.

5. **Test results:**

5. Test results.		Table 1
Requirements of EN 716-1:2017+AC:2019	Test parameters according to EN 716-2:2008	Requirement fulfilled (+) Requirement not fulfilled (-)

4. Safety requ	irements, EN 716-1:2017+AC:2019	
EN 716-1:2017+AC:2019, (4.2.1) - Materials an	nd surfaces	
- the manufacturer, importer, retailer shall provide verification that all accessible parts meet the relevant requirements from EN 71-3.		Not evaluated
EN 716-1:2017+AC:2019, (4.2.2) - Flammabili	ty of textiles, coated textiles and plastics	
coverings		Not applicable
- when tested in accordance with EN 1103, there	shall be no flash-effect.	
EN 716-1:2017+AC:2019, (4.3) - Initial	EN 716-2:2017, (5.2) - Stability:	
stability	- the mass of weight 10 kg;	+
- the cot shall not overturn.	- horizontal outwards force 30 N.	
EN 716-1:2017+AC:2019, (4.4.1.1) - Edges and		
- accessible during normal use shall be rounded o	r chamfered and free of burrs and sharp	+
edges.		
EN 716-1:2017+AC:2019, (4.4.1.2) - Self-tappin		
- Self-tapping screws shall not be used to fasten a		+
removed or loosened when dismantling the cot for purposes of transportation or storage.		
EN 716-1:2017+AC:2019, (4.4.1.3) - Labels and decals		
- Glued labels and decals shall not be used on		+
unless they are below the level of the cot base or		
EN 716-1:2017+AC:2019, (4.4.1.4) - Small	EN 716-2:2017, (5.5.2) - Small parts,	
parts	torque test:	
- There shall be no small parts which are	- rotation of 180° from the original	Not applicable
considered grippable by a child and which may	position has been attained; or	
fit wholly into the small parts cylinder.	- torque of 0,34 Nm is reached;	
	- the maximum rotation or required	
	torque shall be applied for (10 ± 2)	
	seconds.	
EN 716-1:2017+AC:2019, (4.4.1.5) - Castors ar		
- Castors/wheels shall not be fitted except in the following configuration, either:		Not applicable
a) two or more castors/wheels and at least two other support points, or,		
b) at least four castors/wheels, of which at least tw		
EN 716-1:2017+AC:2019, 4.4.2.1 – All other ad		
- Shall be less than 7 mm diameter, between 12 mm and 25 mm diameter, or 45 mm and 65		+
mm when tested in accordance with EN 716-2:20	1/, 3.4.1.
